

The Sun Café Pod Brewer offers you features that other Single Serve systems don't.

- ❖ Programming options that allow you to calibrate each of the (5) Volume settings to your own individual taste.
- ❖ Coffee & Tea pods from many fine Roasters will work in the Sun Café. This offers you more variety than any other single cup in the plastic capsules.
- ❖ The Sun Café has unique flow channels in the pod holder that prevent water from flowing around or through the pod too quickly.
- ❖ A paused water flow system optimizes the contact between the water and the coffee.
- ❖ The Sun Café uses a strong pump that produces approx. 35 psi of pressure in the Brewing Chamber. This pressure along with the temperature of 195 degrees F water at the brew head, combine to capture and extract all the flavor, aroma and complexity of the coffee in every cup.
- ❖ Our built in boiler provides a very fast recovery between servings. You can also take advantage of having instant hot water for other beverages and products such as: Hot Chocolate, Cups of Soup, and Instant Oatmeal.
- ❖ "Greener" than Keurig & Tassimo, as pod is 100% compostable.
- ❖ Has a built in aerator, which produces a nice crema on top of your coffee. (This feature can be removed from the brewer).
- ❖ Able to produce various sizes of beverages: 5oz., 8oz., 9oz., 10oz. & 12 oz.
